

School and OSHC Musical Story Telling Workshop

Miss T, a children's music teacher, presents this very creative and interactive workshop.

This 90-minute workshop is available in 2 different levels to suit respective ages. They both involve a high amount of creative thought and physical process along with musicality, dance and drama.

The workshop consists of 3-4 different stories presented first in a 45 minute production, showing the children how you can enlarge, change or add to a story through the use of other mediums, such as musical instruments, costumes, props and more.

After the presentation the children will be divided into groups of 8-10 and a leader named. Each group will have a performer or teacher to help and assist, but the majority of the ideas will come from the children.

Prep-Year 1 = Adaptive Creative Musical theme

The younger children will get 1 of the featured stories per group and then recreate it in their own version with the aid of all the props, costumes etc that are made available. Generally sticking to the main storyline as a base.

Year 2- Year 3 = Fractured Fairy Tales

The stories for this group will be different and age appropriate. The older group will get the chance to totally pull apart the story and recreate in a modern and updated version. This will engage them to think out of the box and really push their creative boundaries.

Presentations

Each group will then present their productions to the other children as an audience on a pre made stage with a beautiful backdrop and curtains.

The older group will also have use of microphones, smoke machines and bubble machines, to add to the illusions, however these will only be controlled by one of the performers.

Disco Dance time

If time permits, after the fabulous productions are viewed, all children will have the chance to dance off any leftover energy with a Disco.

Modern age appropriate music with bubbles will give them a chance to let loose and have fun with all their own creative moves!
